

ELECTRIC GENERATION

OFFERING INNOVATIVE SERVICES FOR POWER PRODUCERS.

Natural gas-fired power is another growth market for Energy Transfer. We currently serve 27 gas-fired generation facilities totaling over 13,645 megawatts of capacity along the Panhandle Eastern and Trunkline Gas pipeline systems.

Our diverse supply portfolio provides our customers with a variety of reliable and economical sources. We have access to the major natural gas supply regions of the Louisiana and Texas Gulf coasts (including deep-water and deep-shelf supplies), as well as the Midcontinent, Rocky Mountains, and Canadian supply. Our Lake Charles LNG facility in Lake Charles, Louisiana, provides an additional alternate, reliable supply source with a regasified sendout capability of 1.8 Bcf per day and a peak day deliverability of 2.1 Bcf per day.

Energy Transfer has the operational flexibility and expertise to meet power plant needs. Our staff includes experienced and knowledgeable experts in marketing, operations, engineering and customer service to deal with the special needs of our generation customers. Our flexibility extends to rate structuring, including power and gas indexing.

ELECTRIC GENERATION SERVICES

Besides standard IT and FT services, we have designed services to meet the specific needs of our generation facilities' connections.

- **Hourly Firm Transportation** – Customized flow patterns to meet the needs of electric generators.
- **Quick Notice Transportation** – Flexible nomination/scheduling procedures for shippers who need to react quickly to flow rare changes.
- **Enhanced Firm Transportation** – Provides non-ratable flow in the gas day.
- **Gas Parking Service** – Parking and lending to minimize imbalances and penalties.
- **Flexible Storage Service** – Allows for customized firm injection and withdrawal rights subject to Energy Transfer's approval.
- **No Notice Service** – Combines transportation and storage services to simplify nominations and imbalance management.
- **Flexible Field Zone Firm Transport** – Tailored to enhance gas supply attachment offshore.
- **Intraday Gas Parking Service** – Provides intraday swing for shippers using standard IT or FT services.
- **Delivery Variance Service** – Provides incremental tolerance for daily scheduling variances.
